# **AC<sup>+</sup> Scissor Lifts Product Manuals**

Founded in 2005, Zhejiang Dingli Machinery Co., Ltd. is a leading manufacturer of intelligent aerial work platforms in the world, covering a total area of 710,000 square meters (175.4 acres), with a construction area of 590,000 square meters and an annual output value of more than 10 billion.

Dingli has been applying the core concepts of "Carbon Peak" and "Carbon Neutral", as well as energy saving and emission reduction throughout the whole process of corporate governance, which are mainly reflected in the green travel of employees, green park construction, green production and manufacturing, green product R&D, and green recycling re-manufacturing

Technological innovation is the core tenet of the company, Dingli has R&D centers in Italy, Germany and the USA, an Enterprise Research Institute in China, has been awarded more than 250 patents, of which more than 100 patents of invention, more than 60 foreign patents, 5 computer software copyright registration certificate, Dingli also participated in the formulation of 16 national standards and 9 industry standards, fully realizing technological globalization. Dingli's over 200 types of aerial work platforms by independent R&D that are the most in the industry, have all passed authoritative certifications such as CE in Europe and ANSI in the US, and are exported to over 80 countries and regions worldwide.

In line with the trend of electrification, greening and intelligence, Dingli has realized collaborative, green and safe manufacturing based on the "future factory" with the highest degree of automation in the industry. Electrification is the key for Dingli's energy-saving solutions to customers. Dingli is the first in the industry to electrify the entire range of products, among which the boom series with large load capacity and modular design is the first in the industry. By advocating the efficient use of recycling energy, the company has established re-manufacturing factories to provide customers with full life cycle services for products.

In order to better convey the global green development concept, Dingli has invested in MAGNI (Italy), CMEC (USA) and TEUPEN (Germany),

with innovative technology as the grip, green products as the entry point, Dingli set up more than ten overseas subsidiaries, serving global customers with electric aerial work platforms.

Dingli has been recognized as a "National Manufacturing Single Item Champion Demonstration Enterprise" by the Ministry of Industry and Information Technology; been awarded the "IAPA 2024 Product of the Year Categories - Scissor Lifts & Vertical Masts", realizing the zero breakthrough of Chinese manufacturing in the industry's most authoritative international awards. Dingli has been honored with "2021 ACCESS M20 Global Aerial Work Platform Top 3 Manufacturers", "Top 40 Global Construction Machinery Manufacturers". Mr. Xu Shugen, president of the board, was the first Chinese selected as a member of the IAPA judging panel since the establishment of this international award.

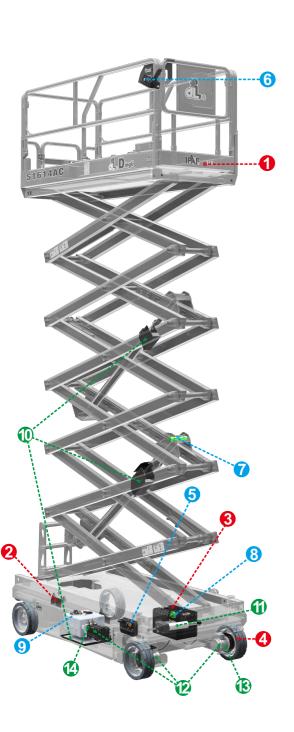

Dingli is also committed to building an equal, diverse and inclusive corporate environment, by actively empowering women to realize gender diversity in all positions in the male-dominated machinery manufacturing industry, respecting different voices to keep team innovative and resilient for a long time, promoting the development of the industry and ushering in a new era of electrification of non-road mobile machinery to lead the green transformation. Meanwhile, Dingli has built a harmonious supply chain, connected upstream and downstream to create the world's only industrial park for aerial work platforms. Dingli has been fulfilling social responsibilities establish the "HongDing Fund", and actively carry out warm-hearted volunteer service activities such as poverty relief, fundraising and disaster relief, etc.

Through the entire life cycle of enterprise ecology, "green sustainability" is becoming the focus of Dingli's high-quality development. In the future, the company will continue to upgrade the "future factories", deepen the green and energy-saving strategy, lead the "new era of electrification of non-road mobile machinery", make aerial work platforms "Made in China" shine internationally.

PAGE

# Comprehensive Upgrade Fourteen Benefits

# **Three-Year Comprehensive Warranty**

# Performance+

#### Industry Leading Platform Capacity

For load capacity, maximum increase up to 40% compared to the original model (load capacity varies by model height).

#### 2 Side and Rear Forklift Pockets

Through the optimization of load distribution and the improvement of the stability and safety for loading & unloading, the transition efficiency is greatly increased.

#### LFP Battery Pack

The Energy density of LFP battery pack is comprehensively improved, combined with energy-efficient power system, offering long endurance that exceeds the traditional high-capacity lithium batteries, at the same time, it effectively reduces battery capacity and saves the future battery replacement and maintenance costs. The modular replaceable design makes it free to switch lead-acid / lithium-ion power.

#### 4 High Strength Damage Resistant Tyres Compound

Newly upgraded compound formulation with a 100% increase in tear and cut resistance. Innovative tread and profile, combined with upgraded compounds, increases the tire's grounding area, making the stress distribution in the contact surface more even, lowering the unit pressure in the grounding area and increasing the overall wear resistance by 30%.

The rolling resistance is reduced by 6% to effectively control the energy loss during driving, better in energy-saving.

# Reliability+

#### 5 Four-in-One Controller

Integrated ECU / dual drive motor control / pump motor control / tilt control.

35% increase in power density: Optimized circuit layout and improved component performance result in a significant increase in output power for the same volume.

40% reduction in parts costs: Reducing the quantity of hardware such as discrete devices and supporting harnesses, connectors, etc.

#### 6 New Platform Control Box

With advanced material technology, the service life of the silicone buttons is improved to 1 million times of trouble-free operations, and the antifouling performance of the silicone button panel is 50% higher.

Equipped with a new high-resolution dot matrix display, 350% increase in the visual range, significantly widening the viewing angle coverage; the actual visual area of the display is increased by 270%.

#### High Precision Redundant Load Sensing System

ambient temperature.

Direct and precise detection of loads with 20% higher overload accuracy.

Precise control and safety: Real-time, accurate monitoring of load changes to prevent overloading and ensure that equipment will not be damaged or cause safety accidents due to excessive loads. High stability: Compared to traditional hydraulic weighing, it is more stable without the influence of

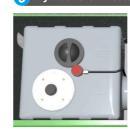

#### Redundant Scissor Angle Sensing System

Safety is increased by 100% and limit switches are reduced by 60%.

Real-time cross-validation of each sensor's data effectively prevents misoperation caused by erroneous signals, largely increasing the system's safety level.

#### 9 Hydraulic Oil Heater (Optional)

Configuration of heater for heating the hydraulic oil in cold environments.

## **Environment+**

#### 10 Hydraulic Oil Leak Containment

Standard option of leakage receiving device, greatly reducing hydraulic fluid contamination.

#### 11 Electric Actuator Steering System

Integrated steering drive module with torque / speed / length / overload protection up to IP69K, millisecond response time, ±1mm positioning accuracy, 15% increase in steering speed and 66% reduction in energy consumption.

Compared with traditional hydraulic steering, electric actuator steering is more efficient without influence by high and low temperatures.

#### 12 Gravity Down Energy Recovery System

Storing self-weight potential energy through synchronous reluctance motors and re-supplying power support when the load rises or additional energy is needed, increasing the overall efficiency of the system by 20%.

During self-weight descending, the hydraulic oil from cylinder will drive the gear pump, and then drive the motor, the motor will charge the battery, so that the overall energy utilization of the system is improved.

#### 13 High Efficiency Drive System

High efficiency: With a wide speed range, the motor keeps running in high performance zone. Environmentally friendly: Not rely on expensive and resource-limited rare earth materials, reducing the dependence on rare resources. The driving capacity is increased by 15%, the

The driving capacity is increased by 15%, the rated current is reduced by 25%, and the power density is increased by 45%.

#### 14 High Efficiency Pump System

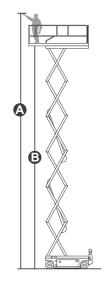

Integrated pump station integrates motor, pump body, valve group, oil tank, etc., hydraulic pipe is reduced by 90%, only one hydraulic outlet pipe is needed, which greatly reduces the problem of hydraulic oil seepage; through precise matching and intelligent control, the reliability and lifting capacity of the whole system is further improved. The lifting capacity is increased by 25%, the starting current is decreased by 20%, and the power density is increased by 32%.
